

Integrating Concepts in Biology

PowerPoint Slides for Chapter 16: Variation and Population Genetics

Section 16.1: What causes individual
variation?

by A. Malcolm Campbell, Laurie J. Heyer, &
Christopher Paradise

Section 16.1: What causes individual variation?

Biology Learning Objectives

- Evaluate the processes by which variation is generated in organisms and how this affects information at the population level and natural selection.
- Differentiate between independent assortment and crossing over.

Zinc contamination and pH in soils surrounding a smelting operation in Pennsylvania

Figure 16.6

Data from Caiazza & Quinn, 1980, Table 1.

Copper contamination and pH in soils surrounding a smelting operation in Pennsylvania

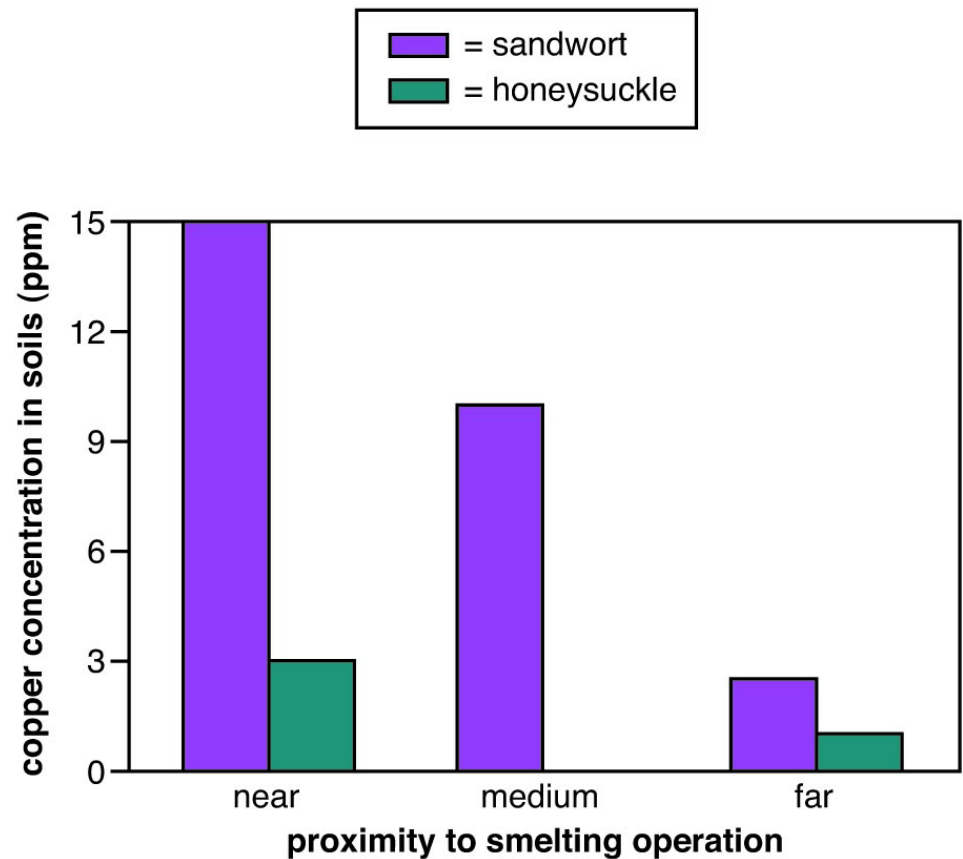

Figure 16.6

Data from Caiazza & Quinn, 1980, Table 1.

Zinc and copper contamination and pH in soils surrounding a smelting operation in Pennsylvania

distance from smelter that plants were collected

proximity to smelting operation

Data from Caiazza & Quinn, 1980, Table 1.

Figure 16.6

Stomata and hair densities of honeysuckle collected at two times and grown in controlled conditions

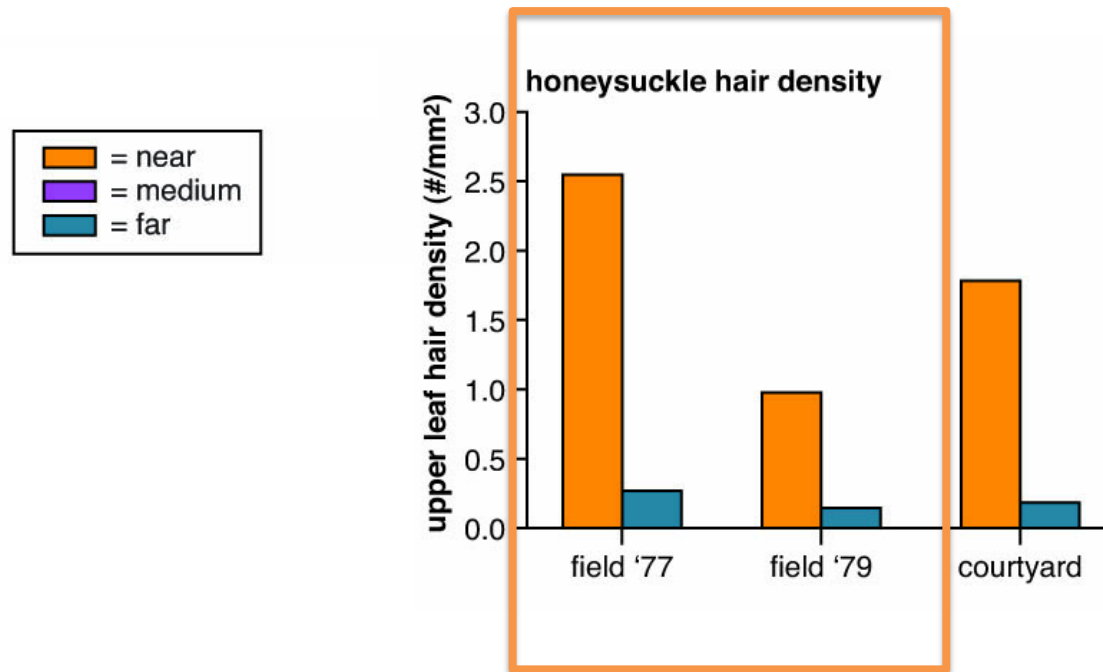

What is the effect of distance to smelter on stomata density?

Figure 16.7

Data from Caiazza & Quinn, 1980, Table 2 and 3.

Stomata and hair densities of honeysuckle collected at two times and grown in controlled conditions

What is the effect of distance to smelter on hair density?

Figure 16.7

Data from Caiazza & Quinn, 1980, Table 2 and 3.

Stomata and hair densities of sandwort collected at two times and grown in controlled conditions

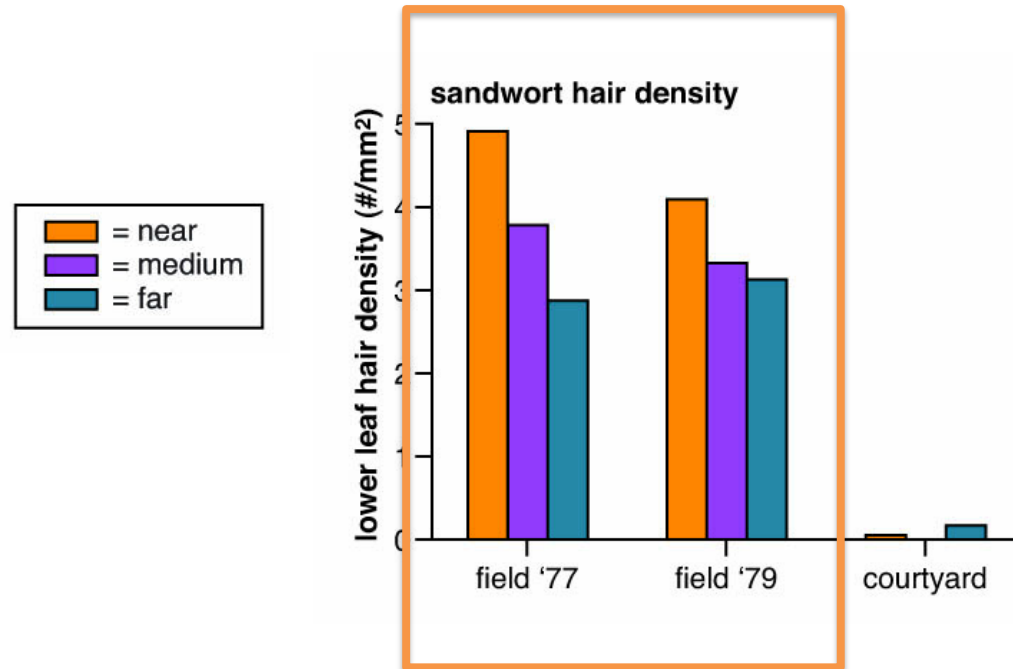

What is the effect of distance to smelter on stomata density?

Figure 16.7

Data from Caiazza & Quinn, 1980, Table 2 and 3.

Stomata and hair densities of sandwort collected at two times and grown in controlled conditions

What is the effect of distance to smelter on hair density?

Figure 16.7

Data from Caiazza & Quinn, 1980, Table 2 and 3.

Stomata and hair densities of honeysuckle collected at two times and grown in controlled conditions

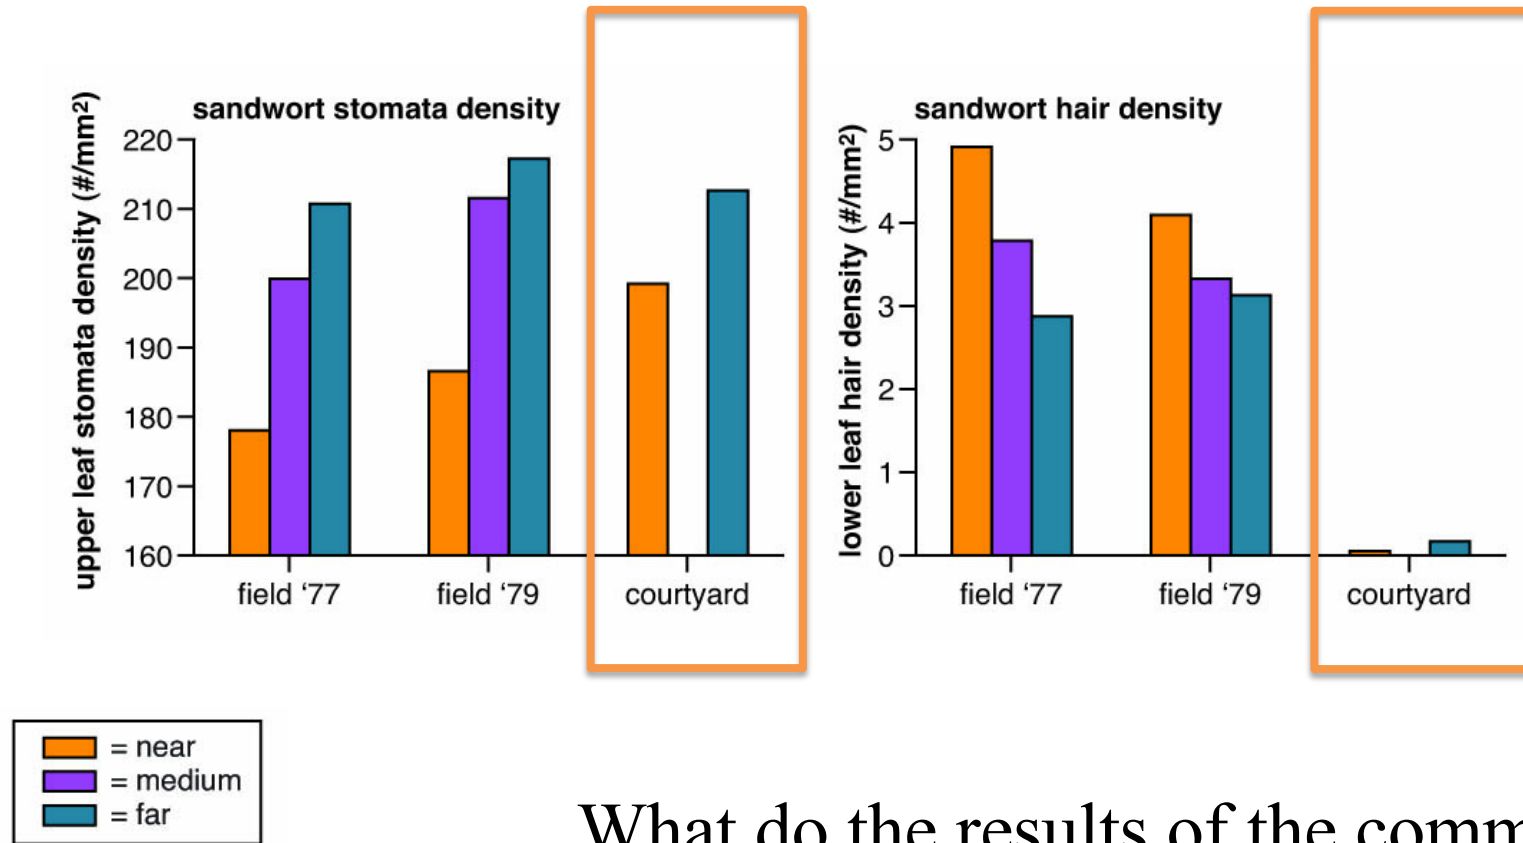

What do the results of the common garden experiment show?

Figure 16.7

Data from Caiazza & Quinn, 1980, Table 2 and 3.

Stomata and hair densities of sandwort collected at two times and grown in controlled conditions

What do the results of the common garden experiment show?

Figure 16.7

Data from Caiazza & Quinn, 1980, Table 2 and 3.

Responses of the acorn barnacle (*Chthamalus anisopoma*) to the snail predator (*Acanthina*).

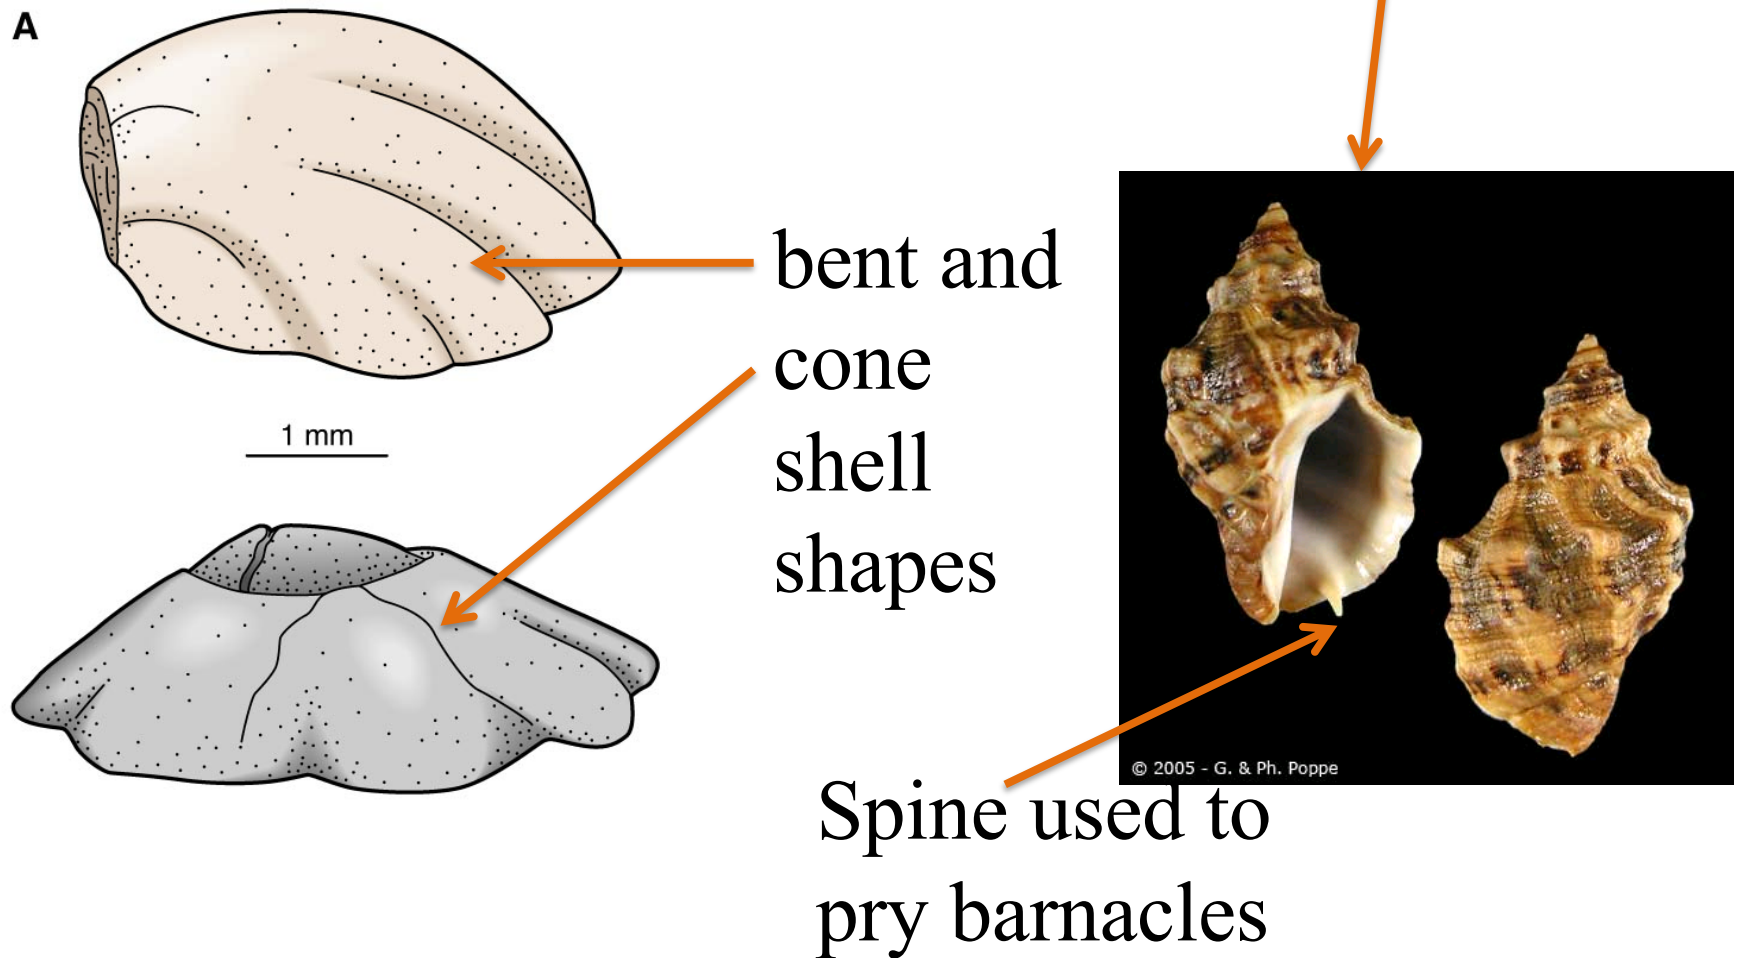

Figure 16.8
